

SITE DEVELOPMENT

A better deployment model.

5G requires operators to develop more sites in less time and lower costs than ever before. The cost of 5G, with penetration levels in excess of 100%, and an insatiable consumer demand for mobile data requires operators to change the way they deploy and operate their networks.

Md7 combines local expertise with a standardized process through the use of LiveTrack to deliver high volume, reduce cycle times and costs, and better lease terms.

-  **SITING/CANDIDATE IDENTIFICATION**
Rooftop, towers and utility/light poles in dense urban to remote mountaintops.
-  **LEASING**
Experience negotiating new leases and amendments with over 100,000 landlords as well as MLAs.
-  **A&E**
 - Lease Exhibits
 - Photo Sims
 - Zoning Drawings
 - Construction Drawings
 - As-Built Drawings
 - Tower Mapping
-  **PROJECT MANAGEMENT**
LiveTrack tracks, manages, and reports the entire workflow from purchase order to on-air.
-  **ZONING AND PERMITTING**
Experience with a variety of municipalities – particularly in challenging areas such as dense urban areas, tourist areas, beach communities, and environmentally sensitive areas.
-  **UTILITY COORDINATION**
 - Utility and Access Easements
 - Fiber to Site
 - Microwave
 - Generator Additions
 - Temporary Solutions

Md7 has been developing innovative solutions for communications networks since 2003.
